Reach Certificate of Compliance

REACH: Based on information obtained from our component suppliers, CRI certifies that all active products contains <0.1% by weight of the Substances of Very High Concern (SVHC) as listed by the European Chemicals Agency (ECHA) under the provisions of regulation (EC) No. 1907/2006 of the European Parliament including the candidate list released February 2026 (253 substances).

Declarations: Products that use a ceramic crystal for microcontroller timing contain >0.1% Lead Titanium Zirconium Oxide (PdxTiyZrz)03 CAS No: 12626-81-2 in component but < 0.1% in total product and therefore our final products do not require reporting. Some alternate sources of our electrolytic capacitors contain >0.1% 6,6'-di-tert-butyl-2,2'-methylenedi-p-cresol [DBMC］CAS No: 119-47-1 in rubber seal but <0.1% is contained in total product and therefore our final products do not require reporting.

Exceptions: Control Resources provides obsolete assemblies for maintenance. Such assemblies may have been manufactured before Reach regulations were in place and therefore may not be compliant. Please contact factory for further information.
